

UltraVine™ Advance Cellular Gold Facial

TheraVine™ strikes gold in the fight against ageing! What is better than having a truly relaxing facial treatment experience? Results that blow you away of course... Here's why you have to try TheraVine™'s UltraVine™ Advance Cellular Gold Facial

THE CONCERN:

Have you been struggling with a dehydrated, dull and lifeless looking skin? Or perhaps you are fighting against the inevitable toll that age has taken on your skin? Radiance and an even skin complexion are essential in obtaining that sought-after younger looking skin.

OUR SOLUTION:

Enter TheraVine™'s UltraVine™ Advance Cellular Gold Facial featuring the revolutionary UltraVine™ Advance Rejuvenating Gold Collagen Film.

As we know, there are various types of collagen masks on the market nowadays but more importantly is what the serum itself contains and whether or not the mask will boost the many actives used in it to secure visible results.

THE SERUM:

The UltraVine™ Advance Rejuvenating Gold Collagen Film's serum contains a powerful trio of Ascorbic Acid, Retinol and Kojic Acid which collectively assist in boosting skin moisture content, have brightening and lightening effects on the skin and pigmentation, prevent signs of ageing, rejuvenate the skin, and are packed with anti-oxidants (which protect cells from free radical damage).

Additionally, Prune extract and Grapeseed oil assist in moisturising and smoothing the skin. What more do you need!

If that wasn't enough, another key element to the serum is the Hydrolyzed Glycosaminoglycans, which are a mixture of plant derived components similar to the natural Glycoaminoglycan molecule found in the skin. They have the ability to bind with water efficiently and increase hydration, improve the elasticity and firmness of the skin, and are easily accepted into the skin because of their positive charge. Moreover, they can moisturise the skin and improve the appearance of fine lines and wrinkles by temporarily minimising the depth of wrinkles on the skin. The addition of pure, soft 24K Gold and sparkling Diamond Dust enhance the effects of the actives leaving the skin moisturised and glowing with illumination.

WHAT TO EXPECT:

The UltraVine™ Advance Cellular Gold Facial effectively combines cosmeceutical science with the luxury of a spa experience, providing clients with time to relax while, at the same time, providing exceptional results and redefining the meaning of 'luxury' forever.

Regain younger looking skin with a radiating golden glow – designed for mature, dehydrated and environmentally stressed skins, the lavish UltraVine™ Advance Cellular Gold Facial will leave your skin looking radiant, illuminated, moisturised and revitalised.

"This treatment is the embodiment of science and opulence. Based on TheraVine™'s breakthrough anti-oxidant technology, the UltraVine™ Advance anti-ageing concept promotes the skin's DNA repair system while luxuriously soft and delicately scented creams, serums and balms transport your skin to an advanced state of renewal and serenity. The anti-ageing jewel, a collagen film mask imbedded with pure, soft 24K gold and sparkling diamond dust coupled with a concentrated serum infused with super-charged actives, will visibly tone, polish and brighten the skin leaving it glowing with illumination" says TheraVine™ training manager Juanita Scholtz.

THE RESULTS:

- Firm, moisturise and reduce the appearance of wrinkles
- Protects the skin against the abuse of elements
- Increases skin comfort levels and improves suppleness
- Brightening effect on skin, thus lightening effect on pigmentation
